

Empathy Map

Date	5 July 2026
Team ID	xxxxxx
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	4 Marks

Empathy Map

1. Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • I need the best crop recommendation for my land. • I want to improve crop yield. • The system should be simple to use.	THINKS • The system should be simple to use. • Will AI improve farming decisions? • Are soil nutrients sufficient?
Farmer (Primary User)	
DOES • Checks soil nutrient values. • Enters values into the application. • Uses recommendation for cultivation.	FEELS • Confused about crop selection. • Worried about crop failure. • Satisfied with accurate recommendations.
